INDUSTRIAL PRODUCTION

The index of industrial production remained stable between April and May, concealing contra movements in manufacturing, mining, and electricity and gas. Manufacturing production rose, compensating for the decline in both electricity and gas and mining. The sharp decline in mining was concentrated in iron, uranium, nickel and fuels.

EMPLOYMENT AND AVERAGE HOURS WORKED

In May, the seasonally adjusted non-agricultural employment index rose for the second consecutive month. The increase was general. Mining, with a sharp decline, was an exception. Average hours worked per week in manufacturing remained flat through April and May.

RETAIL TRADE

In May, seasonally adjusted retail trade rose sharply. The majority of the components participated in the increase particularly grocery and combination store sales. Department store sales climbed back to their March level.

SELECTED GROUPS IN RETAIL TRADE

In May, new passenger car sales fell for the third consecutive month. Clothing store sales rose while furniture and appliance store sales continued to show weakness.

(i)Averages or totals of unadjusted data.

*Sessonal adjustment computed by Central Mortgage and Housing Corporation.

(a) Three-term moving average of seasonally adjusted data.
(b) Preliminary figure, subject to upward revision in August.

EXPORTS AND IMPORTS AND CORPORATION PROFITS

In May, seasonally adjusted exports fell. With the exception of metals, which showed moderate strength, the decline was general. Corporation profits fell sharply in the first quarter.

(a) Annual estimates are as of June 1. (b) Seasonally adjusted at annual rates. (c) Manufacturing inventory owned by manufacturers, whether held at plant of not, at end of period. (d) Rough cords of 128 cu. ft. (e) In urban areas of 5,000 population and over. As of January, 1957, figures are not strictly comparable to those of 1866 due to the inclusion of additional municipalities in the "urban 5,000 and over" category. (e) Average of weekly rates. (f) Middle of month. (e) Revises according to new bench marks. (e) Prior to January, 1957, this total includes he at amount generated by the more important central electric stations, i.e. companies municipalities and individuals selling or distributing electric energy. From January, 1957 it includes all generating agencies producing over ten million kilowatt hours per year. (iii) End of period. Including personal savings deposits.

Note.—Until the end of 1936, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residents.

Figures for 1957 and 1958 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month.

of occurrence.

O'Not applicable to figures on population and immigration.

O'Yukon and North-West Territories not included in figures for births, marriages and deaths.

O'Extimates are given by years as of Juse 1 and by quarters for Canada.

O'Exclusive of stillbirths.

O'Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

"In this report, the quarterly data published in "National Accounts, Income and Expenditure, Fourth Quarter and Preliminary Annual 1957" have been mechanically linked for the years 1956 and 1957 to the new annual levels published recently in the reference document, "National Accounts, Income and Expenditure, 1926–1955" and Supplement. This linking process, which is carried out at the major group level, gives rise to small adjusting entries which are a reflection of slight weighting differences between the two sets of data. Revised quarterly data for the entire post-war period are at present in course of being re-worked in detail, and will be published later in the year.

⁽a) The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for carmings of the Canadian Wheat Board. Recause of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item. (a) Includes adjusting entry. (a) Includes residual error of estimate. (a) This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.8.

(i) Excludes gold. (ii) Arithmetically converted from 1935-39=100. (ii) Indexes August, 1956—July, 1957 are final with the inclusion of final participation payments for Western grains. (ii) Excluding Newfoundland. Western grain prices used in the construction of the Index prior to August 1, 1957 are final prices. Since August 1, 1957, only initial prices are available for wheat, usts and barley.

Note: The coverage of this series has been expanded as of January, 1957 to include, in addition to Central Electric Stations industrial power installations that generate electricity for their own use. Except for utilities, comparable data for previous months are not available.

O'Prior to January, 1957, these totals include the net amount generated by the more important central electric stations, i.e. companies, municipalities, and individuals selling or distributing electric energy. From January, 1957 they include all generating agencies producing over ten million kilowath hours per year. The total generation are not available for disposal for January, 1957 on the old basis was 7,170 million kilowath hours.

O'Drotal net generation less set exports. Total power available for disposal for January, 1957 on the old basis was 7,170 million kilowath hours.

O'Maisly the amount used in electric boilers. Source: Monthly Report, Electric Power Statistics. D.B.8.

⁽i) In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Consus of Industry values.

O'Total new orders received during the period, at estimated selling values. The series cover total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

O'Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry as obtained from annual surveys.

O'Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period. Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, D.B.S.

O'Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

O'Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and O'Mill shipments destined for export.

Source: Monthly Report on Primary Iron and Steel, D.B.S.
Note.—Effective January, 1957, the data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included. On this account totals shown are not comparable with those of previous years.

(i) Shipments for further processing within own firm and for sale in Canada.

(i) Includes some allvery pig iron formerly included with ferro-alloys.

(ii) Excluding shipments for processing.

(iii) Imports all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings.

(iii) Excluding shipments for processing.

(iii) Imports all other shapes, wire and steel, D.B.S.

(a) Imports include, in addition to

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureas of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Motropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample area lying outside these municipalities were also chosen for complete enumeration; in June, 1985, the number of sample areas was increased to nearly 800.

O'The coverage was extended to 507 municipalities in 1948, and as of 1956, stands a 901, minor revision still being required in the table, due to the non-receipt of returns from a few amall places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

O'Include subsidy on hogs.

O'Based on price for hogs including Dominion premium. A rise in ratio favours production of best.

O'Previous to

January, 1968, quotations referred to steem up to 1,000 lbs. Now they refer to all weights.

⁽i) Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1956 and 1957 differ from the sum of the monthly data due to revisions which cannot be allocated by months.

(i) Prior to January 1957, includes the C.P., C.N., Quebec North Shore and Labrador and Pacific Great Eastern railways. Beginning in January, 1957, all railways follow the uniform classification of accounts, and the statistics previously shown in the "Other Railways" section in the upper half of the table are combined, as of that date, with those railways already following the new system.

(ii) Operating expenses adjusted for tax accruals and rent of equipment and joint facilities.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

(iii) As of January, 1955, statistics include the British Columbia Electric Railway.

^{*}Foreign items are so longer shown separately under assets and liabilities, but are included in a single net balance under "assets". The totals for assets and liabilities are revised to reflect this change in presentation.

**OBank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

**OThe figures are not adjusted for items in transit.

**OThe statutory minimum requirement is a monthly average of 8 per cent.

**OMainly deposits of foreign banks.

**OCapital, rest fund and undivided profits as at the latest fiscal year-end.

**OR principle of the figures for proceeding morthead, which are based on "not exceeding market value".

**OSecurities purchased direct from issuer with a term of less than one year at time of issue are classified and are not directly comparable with fine currency liabilities.

**ODE of the figure of the figures of figures of the figures of the

Nots.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and remains bonds without insurance. Totals are estimates projected from the sales reported by \$2 companies operating in Canada representing \$9 per cent of new ordinary insurance sales.

**OThe Canada totals by months for 1957 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces.

The data for 1957 and 1958 are subject to revision.

(a) Ordinary, Industrial and Group.

(b) Part of the apparent increase between 1957 and 1958 is due to a change in the "inflation" factors used to bring figures of reporting firms up to the estimated total level for all insurance companies. It is estimated that the 1957 figures for "ordinary" and "group" were understated by about \$\%\$. Source: The Canadian Life Insurance Officers Association.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to set profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies arming profits less the losses of all companies incorporated in Canada (seeleding government-owned companies and incorporated co-operatives).

(Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

Rabber, Leather, Non-Metallic miserals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(Includes, in addition to the industries listed, Tobacco, (Includes))

(Includes) in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

(Includes) Includes Printing and Publishing and Allied Industries.
